

## My Learning Challenges

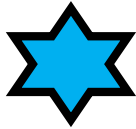

Your child will read as many tricky words as they can before the timer runs out.

Your child will go on a material hunt around the classroom, looking for items made of wood, metal, glass, plastic and fabric.

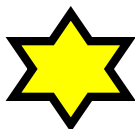

Your child will sort the monsters according to different criteria E.g. It has a hat/It doesn't have a hat.

Your child will sort toys into two groups. Toys they would play with as a baby and toys they would play with now.

Your child will practice different design techniques such as folding, linking, joining and fringing.

Your child will write appropriate adjectives to describe a variety of different objects. Your child will record the adjective on a post-it note.
